FINAL RELEASE

NuTech Solutions Grows With Industry Focus

CHARLOTTE, NC – January 25, 2005 – NuTech Solutions, a leader in the commercialization of evolutionary computation software for advanced predictive analytics, announces new team members who will support the company's strategic industry focus.

NuTech Solutions solves difficult business problems and creates competitive advantage for a variety of commercial organizations and governmental agencies. As a result of continued growth, the company is adding emphasis on providing solutions for unique and complex business problems in five specific industries: Automotive, Petroleum, Consumer Products, Financial Services and National Security.

"Our strategic planning calls for heightened focus on solutions for industry leaders in these five sectors," said Tom Wilson, CEO of NuTech Solutions. "We will also continue to meet the needs of other Fortune 500 clients with our advanced horizontal offerings, such as supply chain, pricing and strategic planning optimization."

Supporting the corporate growth plans, several prominent technology professionals have joined NuTech's team:

- Susan Johnson joins the sales team as Director of Industry Solutions, focusing on sales to the financial services industry and other key accounts. Susan is a software and services industry veteran, recently serving in a leadership role at a major Customer Relationship Management (CRM) software firm.
- Jennifer Koures, Director of Marketing, will be heading marketing and lead generation activities. Jennifer's sales and marketing expertise was honed at companies delivering market-leading Enterprise Resource Planning software and solutions.
- Mike Gould, Ph.D. serves as Senior Scientist and Office Manager for NuTech's Boston office. Mike is a seasoned leader and project manager having directed several large scientific research teams and has implemented advanced optimization solutions as a customer.
- Sergey Malinchik, Ph.D. joins NuTech as a Senior Scientist specializing in agent-based modeling, complex adaptive behavior and evolutionary computation.
