FINAL RELEASE

Géant Chooses NuTech Solutions to Analyze Hypermarkets Customers Behavior

CHARLOTTE, NC and WARSAW, POLAND – December 5, 2005 – NuTech Solutions, a leader in the commercialization of advanced software for data mining and modeling, today announced their work with Géant Polska Sp. z o. o. to help Géant improve marketing and promotional effectiveness.

Casino Guichard-Perrachon Group operates over 9,000 food retailing outlets in 15 countries, including Cash & Carry in the US. In 1996 the French company expanded its European presence, introducing their chain of hypermarkets, known as Géant, into the Polish market. Currently there are 18 Géant hypermarkets, located in the largest cities in Poland. Using software from NuTech Solutions, Géant plans to identify consumer behavior dependencies and shopping patterns across these hypermarket locations.

NuTech Solutions' Intelligent Business Engines™ for Data Mining will help Géant analyze store purchase transactional data, as well as feedback from customer surveys. Using NuTech's modeling software, Géant's enhanced understanding of customer behavior will enable the company to modify marketing tactics and promotional campaigns to improve effectiveness, resulting in stronger customer loyalty and increased sales.

"Géant is devoted to satisfying customers' needs, by offering them high quality products at an affordable price," said Géant's Marketing Research Manager Marek Kempka. "NuTech Solutions' analytic software will enable us to accurately adjust our promotional campaigns, to better address the specific characteristics of our customers."

Maciej Michalewicz, President of NuTech Solutions, Poland noted, "We are very pleased to add one of the largest hypermarket chains to our growing list of customers worldwide. We anticipate our software will contribute to achieving measurable marketing improvement results for Géant, as was the case for petroleum retailer PKN Orlen, where customer loyalty was significantly improved by altering promotional strategies."
